

727

Odor Control Gel

Residential & Commercial Applications

Most odor control products available today are chemical based formulas that simply mask malodors by releasing overbearing fragrances. BIO-SYSTEMS' 727 is a specially formulated, soap based, odor adsorbent block that significantly reduces odors, replacing them with a very light refreshing scent. 727 is environmentally friendly and does not contain paradichlorobenzene, making it safe for people, animals, and the environment.

Simply remove the lid from the container and place in the affected area for immediate odor relief. For stronger, more stubborn odors, invert 727 onto its lid and slide container off leaving the entire block exposed or, invert the block into a mesh bag and hang wherever needed. To further enhance 727's abilities, place the unit in front of an air source, such as a fan or vent. Air flow assists in spreading the active ingredients throughout the area to neutralize odor molecules.

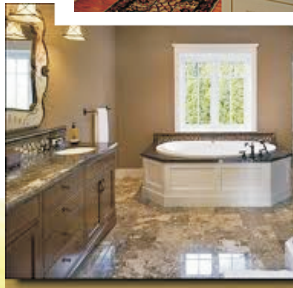

727 can be used for approximately 30 days, you will notice a significant decrease in size. When this occurs simply toss into the trash and replace with another block if necessary.

For longer odor fighting power, place the remaining portion in your vacuum bag or garbage can for continued freshness.

Controls Odors Associated With:

- Mold • Varnish • Stain • Latex • Paint •
- Adhesives • Mildew • Body Odor • Flooding •
- Sewers • Pets • Cigarettes • Diapers • Kitchens
- Bathrooms • Recreational Vehicals • Boats •

Odor Control Gel

Municipal & Industrial Applications

The municipal and industrial waste industries present serious odor control challenges across a variety of applications. These odors (from treatment plants, transfer stations, sewer lines, solid waste storage) become a significant problem not only for employees but for area residents and neighboring businesses as well. Dealing with and eliminating these foul odors can often be a daunting task involving elaborate spray or atomization systems and bulky and heavy drums of liquid.

The 727 Gel is an ideal product offering a convenient solution to all municipal or industrial odor concerns. The unique formulation effectively removes odors from the air and emits a light, fresh fragrance. Easy to handle and apply, the 727 tackles tough odors from liquid, solid, and gaseous waste with ease.

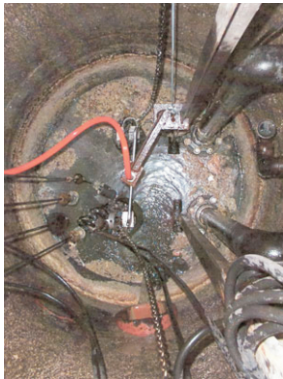

Eliminates Odors
Leaves a Fresh Scent

727 can be used for approximately 30 days, you will notice a significant decrease in size. When this occurs simply toss into the trash and replace with another block if necessary.

For longer odor fighting power, place the remaining portion in a trash can, dumpster, etc. for continued effect.
