## AUTOMATED STEAM BOILER TREATMENT SYSTEM

This automated steam boiler treatment system is the ideal answer for providing continuous chemical feed to a steam boiler that is receiving little dedicated attention. The system consists of a [wall mounted solid chemical feeder](#), a case of [solid boiler water treatment](#), a [programmable chemical feed pump](#), a [pump mounting bracket](#), and a [sulfite test kit](#) to monitor the chemical level.

The benefits of this automated system are:

- No Spills
- No Drums
- No Freezing
- No Dust Hazard
- No Heavy Lifting
- No bulk Chemical Storage
- No Need for Containment Dikes
- No Need for Personal Protective Equipment (PPE)
- Lower Workman's Compensation Risk
- Lower Floor Space Footprint
- Lower Carbon Footprint
- Lower Water Footprint
- Lower Freight Costs
- A Green Product

When the bottle of chemical is empty, you simply place it with your other recycle plastics and replace it with a full one.

This product is available for purchase on line at [www.TheWaterTreatmentStore.com](http://www.TheWaterTreatmentStore.com), which is a wholly owned subsidiary of Richard Hourigan, Inc. The direct link to this product is:
