

Typical Chemical Products Available For Sale

The chemical products shown here are representative of the hundreds that we sell for different equipment and water types. Please enter any specific requirements you may have on our contact page, and we will get back to you within one business day.

If you purchase a case of any of our solid products we will throw in a free test kit appropriate for the product that you purchased. This offer does not apply to the Boiler Lizard® or the drip pan treatments.

Closed Loop Treatments:

Nitrite Based Inhibitor

SCS-3100-S

Description: Our SCS-3100-S Solid Closed System WaterSTX product includes a pH buffered sodium nitrite corrosion inhibitor for ferrous metals as well as yellow metal inhibitors for complete corrosion protection. This product is compatible with Ethylene Glycol.

Corrosion Inhibitor with Molybdenum Tracer

SCS-3200-S

Description: Our SCS-3200-S Solid Closed System WaterSTX product includes a pH buffered blend of corrosion inhibitors for ferrous and yellow metals with a Molybdenum tracer for easy testing. This product is compatible with Ethylene Glycol.

Corrosion Inhibitor with No Heavy Metals

SCS-3300-S

Description: Our SCS-3300-S Solid Closed System WaterSTX product includes a pH buffered blend of corrosion inhibitor for ferrous and yellow metals. This product contains no heavy metals and is compatible with Ethylene Glycol.
