

# Model GF-5E5A1C Glycol Feed

*For Closed  
Loop Systems*

## Key Features

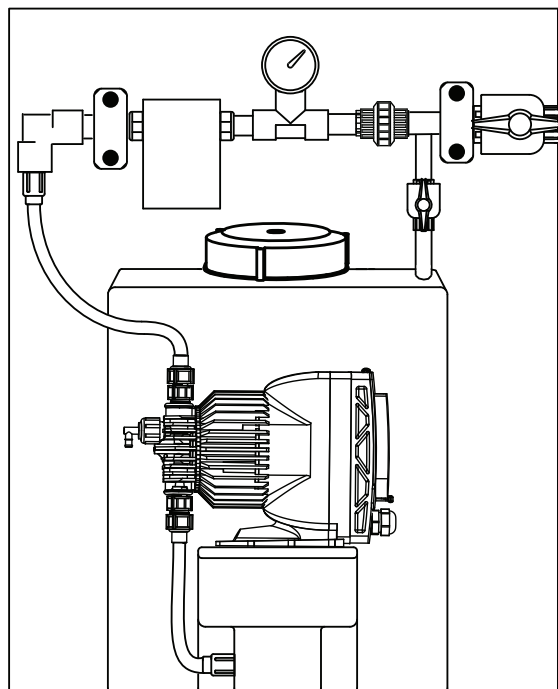

- Compact Design
- Low Cost
- Pre-Assembled
- 30 gpd Pump

## Models

Standard units include 5 gallon poly tank and stand, low level switch, dry contact alarm, pressure relief valve and PVC plumbing assembly with pressure gauge and a 5-20 psi pressure switch.

### Options

- 4     30-50 psi pressure switch for analog units

## Application

The GF-5 is a compact design using a 5 gallon solution tank, 30 gpd at 100 psi metering pump prewired and plumbed to the piping assembly with pressure gauge, pressure sensor, check valve and relief valve.

## Specifications

### Electrical

- Input     115 VAC, 50/60 Hz
- Alarm     Dry Contact  
5 Amp (resistive), SPST

### Plumbing

- Standard     Schedule 80 PVC

**Pressure Gauge**     0-100 psi (0 to 6.9 bar)

### Glycol Tank

- Capacity     5 gallons (18.9 liters)
- Tank and Lid     Polyethylene

### Dimensions

Width 22" (56 cm)  
Height 30" (70 cm)  
Depth 12.5" (32 cm)

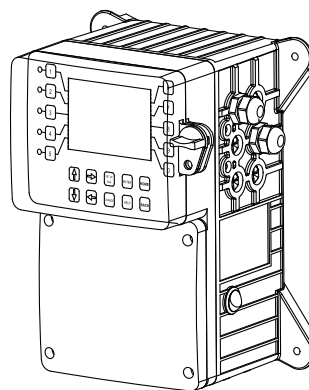

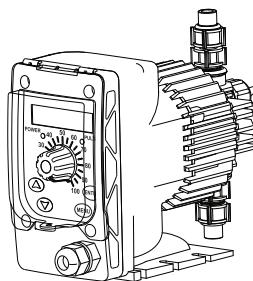

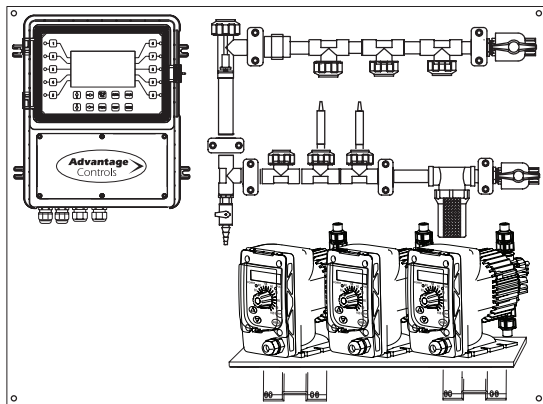

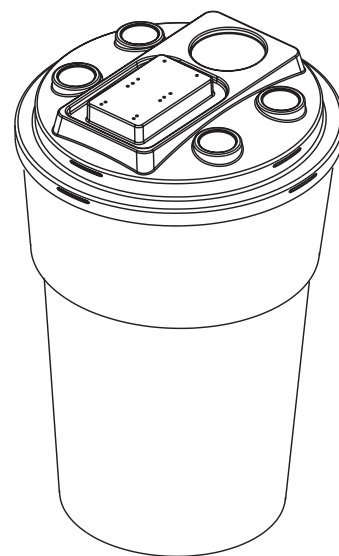

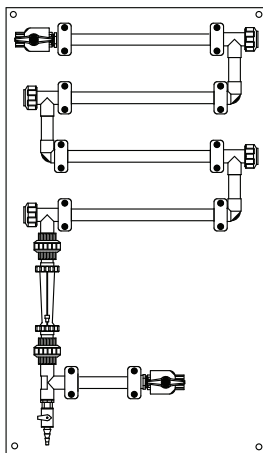

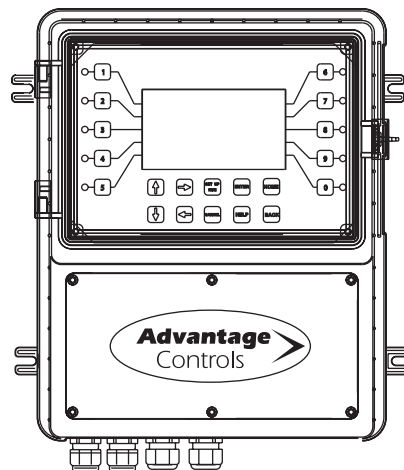

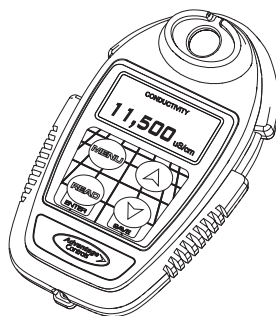

### Shipping Weight

- GF-5E5A1C     31 lbs approximate

# Get the Advantage in Water Treatment Equipment

Advantage Controls can give you the *Advantage* in products, knowledge and support on all of your water treatment equipment needs.

- Cooling Tower Controllers
- Boiler Blow Down Controllers
- Blow Down Valve Packages
- Solenoid Valves
- Water Meters
- Chemical Metering Pumps
- Corrosion Coupon Racks
- Chemical Solution Tanks
- Solid Feed Systems
- Feed Timers
