## HOW WATER EXPANDS WHEN HEATED

Provided by: www.TheWaterTreatmentStore.com
Looking at the following table which I created from the data in my Handbook of Chemistry and Physics, if we assume that water is entering your system at 50 degrees Fahrenheit and use that as our base line of $100 \%$, there is no expansion.

When the water is heated in a hot water system such as a hot water boiler, it expands. Look at the RED lines and select your approximate hot water operating temperature. That extra water volume will need to go somewhere (i.e. an expansion tank).

TABLE OF WATER VOLUME VS TEMPERATURE

| Deg C | Deg F | D gm/ml | D lb/gal |  |
| ---: | ---: | ---: | ---: | ---: |
| 0 | 32 | 0.99987 | 8.338916 | $99.986 \%$ |
| 3.98 | 39.164 | 1 | 8.34 | $99.973 \%$ |
| 5 | 41 | 0.99999 | 8.339917 | $99.974 \%$ |
| 10 | 50 | 0.99973 | 8.337748 | $100.000 \%$ |
| 15 | 59 | 0.99913 | 8.332744 | $100.060 \%$ |
| 18 | 64.4 | 0.99862 | 8.328491 | $100.111 \%$ |
| 20 | 68 | 0.99823 | 8.325238 | $100.150 \%$ |
| 25 | 77 | 0.99707 | 8.315564 | $100.267 \%$ |
| 30 | 86 | 0.99567 | 8.303888 | $100.408 \%$ |
| 35 | 95 | 0.99406 | 8.29046 | $100.570 \%$ |
| 38 | 100.4 | 0.99299 | 8.281537 | $100.679 \%$ |
| 40 | 104 | 0.99224 | 8.275282 | $100.755 \%$ |
| 45 | 113 | 0.99025 | 8.258685 | $100.957 \%$ |
| 50 | 122 | 0.98807 | 8.240504 | $101.180 \%$ |
| 55 | 131 | 0.98573 | 8.220988 | $101.420 \%$ |
| 60 | 140 | 0.98324 | 8.200222 | $101.677 \%$ |
| 65 | 149 | 0.98059 | 8.178121 | $101.952 \%$ |
| 70 | 158 | 0.97781 | 8.154935 | $102.242 \%$ |
| 75 | 167 | 0.97489 | 8.130583 | $102.548 \%$ |
| 80 | 176 | 0.97183 | 8.105062 | $102.871 \%$ |
| 85 | 185 | 0.96865 | 8.078541 | $103.209 \%$ |
| 90 | 194 | 0.96534 | 8.050936 | $103.562 \%$ |
| 95 | 203 | 0.96192 | 8.022413 | $103.931 \%$ |
| 100 | 212 | 0.95838 | 7.992889 | $104.315 \%$ |
